**Synergistic businesses.** Combine Will is an ODM/OEM manufacturer of plastic and die-cast products including premiums, collectibles, toys and consumer products. Its niche is mainly in premiums. To complement this business, Combine Will has also grown into a leading supplier of plastic injection and die-cast moulds for internal usage and for the growing automobile industry. Its third arm is involved in the distribution and installation of advanced machines and precision tools for the mould related industry.

Catalyst 1 – earnings ramp in FY10. A new customer for automatic soap dispenser is expected to boost sales and profit in FY10. The customer's product is already on sale in the US and is slated to go on sale in Europe soon. This is a mass volume product. Given that Combine Will is currently the sole source for this product, margins and volume allocation will be good. It took Combine Will 3 years to clinch this business and as such, it could also take a while before new suppliers are qualified by the customer.

Catalyst 2 – Korea listing. Combine Will also hope that its proposed Korean dual listing will improve valuation and help penetrate into Korean customers. Prior to the Korean listing, Combine Will will undergo a share consolidation exercise. Every 10 shares will be consolidated into 1 share.

**Initiate with BUY and target price of \$\$0.50.** With the return of demand from existing customers and contribution from new customers, earnings could see double growth for FY10-FY11. We derive a target price of \$\$0.50, based on a 10% discount to our regional tech sector average CY12 P/E of 7.8x.

#### **Background**

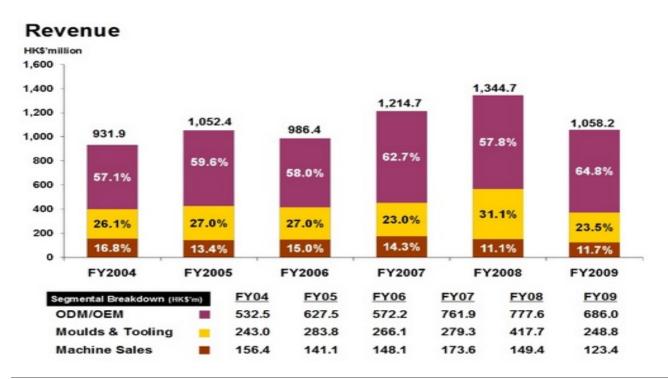

Based in Dongguan, Guangdong province, Combine Will International Holdings was incorporated on 8<sup>th</sup> October 2007. Operations were started in 1992, with the incorporation of Combine Will HK in Hong Kong. Presently, the company's main production base is in Guangdong with factory space covering more than 159,000 sqm and employs more than 10,000 workers.

ODM/ OEM manufacturing operations have increased over the years and manufacturing capabilities have expanded into production of other consumer goods. The ODM/OEM segment has been vertically integrated with the Moulds and Tooling, and Machine sales business segments.

Combine Will is one of the leading suppliers of plastic injection and die-casting moulds in southern China, and a distributor of machines and tools used for the manufacture of moulds, die-cast and automobile products.

Combine Will International Holdings was listed on the Singapore Mainboard on 23 June 2008, at \$\$0.23.

#### **Key segments**

Combine Will has 3 key business segments: ODM/ OEM, Moulds and Tooling, and Machine Sales.

**ODM/OEM manufacturing.** Combine Will manufactures; premiums, collectibles, toys and consumer products. The company is a one-stop integrated manufacturer of plastic and die-cast products. Customers of ODM/OEM products typically hold the rights and licensees for sale and distribution. Hence, customers provide the concept or prototype, while Combine Will's design and development team will advise on material suitability and functional capabilities of products. The fully integrated manufacturing structure of Combine Will allows for a one-stop seam-less development of customers' product, from the drawing board to final production. Major Clients of this business segment are: The Marketing Store, a global brand activation agency; Sieper GmbH, the maker of the Siku brand of replica cars; Liberty Classics, Hasbro and Hong Kong-listed Playmates Inc.

**Moulds and Tooling.** The company is one of the leading suppliers of plastic injection and die-casting moulds in southern China, possessing the ISO/TS16949:2002 certification. Moulds are for both internal use and for the automobile and consumer products industry. Moulds and tooling are manufactured with precision and detail, with a material and design team assisting customers in production and technical advice.

Combine Will is an approved supplier to international automobile manufacturers; Honda, Volvo, General Motors, and Tier 1 suppliers such as Valeo, Delphi and Faurecia. In the consumer and household segment, Combine Will counts manufacturers like Toshiba, Honeywell SEB and Whirlpool as customers.

**Machine Sales.** The machine sales segment was set up in 2000, in response to demand for precision machinery. Combine Will distribute and install advanced machines and precision tools. These customers are primarily involved in manufacturing of mould and die-cast products and auto-mobile parts. The machines distributed are mainly from equipment manufacturers in Japan, USA, Germany, UK, Taiwan and Italy, whose products are renowned for consistency and quality. Combine Will offers a total solutions package, installing machines with the required operating software and after-service sales service.

**Production capacity and marketing footprint.** Combine Will's five production facilities are located in Dongguan, China. The processing factory (leased) is located in Heyuan, China. Total factory floor space is more than 159,000 sq m.

**Track record**. Over its years of existence, Combine Will has established a good track record in terms of quality, punctual delivery and corporate social responsibility. It has won strong referrals from industry players with repeat customers accounting for over 90% of sales. In addition, many of Combine Will customers are market leaders in their own sectors.

**Competitors**. The ODM/OEM industry is characterized by bulk order-volumes, predictable order flows, low seasonal effects and relatively high barriers of entry. At present, Combine Will identifies the following as its main competitors in this business segment:

- · Early Light Industrial Company Limited;
- Forward Winsome Industries Limited;
- Jetta Company Limited;
- Lung Cheong International Holdings Limited;
- · The Merton Company Limited;
- · Wah Shing Toys Company Limited.

Other than HK-listed Lung Cheong International Holdings Limited, the rest of the companies are not listed.

The Moulds and Tooling business segment of Combine Will is focused on automobile parts, with both domestic and international competitors. Competitive pricing is the key competitive edge of Combine Will. Main competitor's are:

- Ace Mold Co. Ltd;
- CIM Precision Molds (HK) Ltd;
- · Ngai Cheong Mould Company Limited;
- TK Moulds Co. Ltd;
- Ultratech Mould Design & MFG Co. Ltd.

In Machine Sales business segment, competition is primarily from distributors of rival machinery and equipment brands. Key competitors are:

- Deckel Maho Gildemeister;
- Fair Friend Ent. Group;
- Kao Fong Machinery Co. Ltd;
- Makino Milling Machine Co. Ltd and
- Okuma Corporation.

## **Industry outlook**

**Growing outsourcing trends.** OEMs prefer to focus on core competencies such as design and marketing, instead of manufacturing, so as to better utilize their resources and retain cost competitiveness. Resources can instead be used to improve other areas of the business such as marketing and design. Through outsourcing, companies are able to reduce capex requirements and shorten the timeframe required to bring products to market. Outsourcing trends are likely to continue into the next decade, creating growth opportunities for OEM/ODM manufacturers.

**Growth in die-casting and mould industries**. The die-casting industry in the PRC is continues to expand. Despite the global financial crisis, total sales revenue of China's Die & Mould sector reached US\$14.3bn, according to the China Die & Mould Industry Association (CDMIA). Exports and Imports of Die & mould products holding steady at around US1.9bn for 2008 and 2009. China continues to be a large importer of machine tools, with the Die & Mould industry accounting for a tenth of 2009's sales revenue of US\$19.4bn.

The Industry also enjoys preferential policies as the Chinese government has deemed the industry integral to the manufacturing sector and hence, the national economy. Government incentives such as tax-free import of machinery and equipment, alongside preferential enterprise income tax rates of 7.5% have fuelled growth of this industry. Moulds and moulded parts are predominately used by the auto industry although moulded plastic parts are also used in the manufacture of home appliances and IT equipment. Guangdong remains at the forefront of manufacturing, accounting for 40% of total moulds produced. Low to mid grade products are prevalent in China, while there is a shortage of high quality, precision cut mould products. There is thus much room for growth for the manufacture of high precision products, which Combine Will occupies.

Car manufacturing in China continues to grow rapidly, passing the 13m mark, as of 2009. Demand for cars likely to accelerate as the citizens grow more affluent, average income per capita has risen an average of 13% from 2005 to 2009 (RMB 18,364 – RMB33,736). With the automobile industry being the largest consumer of moulded parts, and, demand for high quality moulded parts are likely to increase.

Figure 5: Car Production (m units)

Source: China Association of Automobile Manufacturers

Toy products. China is presently one of the world's largest exporters of toys, accounting for 60% of world's toy export market and 90% of US toy imports. Total exports of toys reached approximately US\$7.7b in 2009, with the US, Hong Kong and Germany as the main export markets. Safety issues, however, continue to dog the PRC's toy export industry. During October 2007, the Consumer Product Safety Commission (CPSC) in US recalled several million "Made in China" toys, sold by major brands like Mattel and Marvel Toys. These toys were found to contain unsafe levels of lead. Toys were recalled on other instances due to unsafe parts such as loose magnets that could be swallowed by kids and other safety issues. More recently in August 2010, the Consumer Association of Singapore (CASE) conducted random checks on toys, and found that 46% of the sample size of 50 toys, contained excessive amounts of phthalates, lead or both. Many of the toys which failed the tests carried the "CE" designation, which states that the toy meets EU safety standards. Although these recalls represent an insignificant percentage of total Chinese toy exports, but the damage to China's toy manufacturing industry reputation is farreaching. This negative attention to the industry, conversely, has benefited reputable companies like Combine Will, with a good safety and track record an even more attractive supplier.

## **Company outlook**

**Vertically integrated manufacturing capabilities.** With a vertically integrated manufacturing process, Combine Will is able to engage in mould fabrication, manufacture of moulds and tooling, maintaining quality control and assurance. This allows the company to customise and deliver the products according to customers' requirements. The plastic and die-cast manufacturing capacities of ODM/OEM business segment complements the Moulds and Tooling business segment. This vertical integration of manufacturing process enables Combine Will to take advantage of new business and product opportunities. These initiatives also enable them to develop the know-how to the new businesses and in the process satisfy customers' needs and delivery timeframe.

Established customer relationships. Combine Will works hard to retain customer loyalty, with repeat customers accounting for more than 95% of total sales in FY2004, FY2005, FY2006 and HY2007. These repeat customers have a long established history with Combine Will, enjoying close working relationships. The customer-orientation of Combine Will ensures that customers enjoy customised solutions, with requirements fulfilled. Combine Will also believe in interdependency with customers, working together towards common growth. This is evident in the growing sales that Combine Will derives from major customers.

**Expanding sales and marketing network**. Combine Will intends to increase its presence in China, with the setting up of a factory in the Zhejiang province to supply products and provide better after-sale services to customers around the Shanghai region. This new tooling factory will also give Combine Will a foothold to expand northwards, expanding towards China's north east. Expansion is not limited to the PRC, with a sales office established on Feb 2010, in Seoul, South Korea.

**In-house design capability.** Combine Will has an in-house design and development team comprising designers who are innovative and highly skilled. With their in-house team, the company is able to offer design ideas which are specifically tailored to the requirements of customers. Also, this capability allows Combine Will to create new and innovative designs for their existing products, giving them a valuable competitive edge over their competitors.

A new customer. In the ODM/OEM segment, Combine Will has successfully penetrated a new customer for the manufacture of a hand soap dispenser product. The Company has mentioned in its 1H results that this customer is expected to contribute significantly to its FY10 performance.

**Dual Listing in Korea.** Combine Will previously intended to spin-off its Moulds and Tooling unit on the Korean Exchange, "the KOSDAQ". In light of regulatory and economic issues, Combine Will has decided not to proceed with the spin-off but instead, dual list itself on the KOSDAQ, with the aim of widening the investor base and the raising capital for further growth. The Company intends to consolidate its existing shares at 10 to 1, at an indicative price of \$\$2.30 for each new consolidated share, and subsequently issue 11m of the newly consolidated shares on the KOSDAQ. The dual-listing process is currently in the works, we expect the dual-listing to serve as a positive catalyst on the stock, as more details on the dual-listing are confirmed.

Figure 8: SWOT analysis

#### Strengths Opportunities • Sustained economic growth in China · Ability to provide one-stop service with in-house design capability · Customers growth Established track record and long customer relationships · Government support for the industry · Professional and experienced management Weaknesses Threats • Industry is intensely competitive · Dependent on a few major customers Lack of differentiation · Rising labour costs · Slowdown in US, EU demand · Risk of default by customers

#### **Risks**

**Dependent on major customers.** Major customers are TMS and Siku. Back in FY06 and HY2007, TMS accounted for 25.3% and 39.1% of group sales while Siku accounted for 10.3% and 8.7% of sales. TMS designs, markets and supplies premiums for international brands while Siku is involved in the marketing and sale of toys. Today, TMS and Siku remain key customers in the ODM/OEM segment. Management has recently penetrated a new customer for a hand soap dispenser product. This should reduce the reliance on TMS and Siku.

Inherent labour risks. The operations of Combine Will are labour intensive in nature, with workers sourced from Southern China. Wage costs have increased and jobhopping have been observed. According to CEIC, the average wage of urban workers in the manufacturing industry reached RMB26,500 in 2008, representing a year on year increase of 10%. This tightening of the labour market is expected to perpetuate in the near future, with continuing wage-price pressures. There has also been an increase in labour activism as workers demand better working conditions and remuneration, which cumulated in strikes in South China in early to mid 2010. To retain workers and quell worker's dissatisfaction, Combine Will may have to increase wages of its employees, which could have a negative impact on margins. To mitigate rising labour costs, the Company has been exploring a shift to inner regions as well as some automation.

Figure 9: Annual Manufacturing Wage in China

Source: CEIC, Ministry of Human Resources and Social Security

**Fluctuations in raw material prices.** Combine Will is susceptible to changes in raw material prices, particularly for zinc alloy, plastic resins, electronic parts and steel.

**Slowdown in US, EU demand.** Combine Will has seen a reversal of trends in demand, with 2Q10 showing strong demand from the US, EU regions. However, given that the US and EU regions have been badly affected by the economic fallout, economic growth in these regions is likely to remain muted. However, Combine Will can counter some of this slowdown given that the PRC/ Asia market contributes more than 70% of total revenue.

**Appreciation of RMB against USD.** The gradual appreciation of RMB against the USD raises the average selling price of goods manufactured in China. This reduces the price competitiveness of Chinese made goods vis-à-vis other competing countries. Low margins and rising inflation in China could pose a challenge to Combine Will.

#### **Financials**

**Earnings spurt in FY10.** We expect a strong earnings spurt in FY10 driven by the successful penetration into a new customer for hand soap dispenser. Apparently, Combine Will has been working to be the supplier for this customer since IPO time. The Company has also mentioned in its first half results commentary that it has signed on new substantial customers and that these customers are expected to ramp up production in 2010.

Sales (HK\$ mil) ■ Net Profit (HK\$ mil) 2,500.0 2,059.9 2,000.0 1,597.7 \_ 1,344.7. 1,500.0 1,058.2 1,000.0 500.0 124.2 138.1 72.9 104.6 45.2 0.0 FY09 FY10F FY12F FY08 FY11F

Figure 10: Revenue and earnings trend

Source: Company, CIMB Research

**Dividends likely to stay barring unforeseen capital needs.** Combine Will has been paying dividend since its listing and we believe that the Company will continue to pay a 1 Sing ct DPS unless cashflow requirements from supporting its new significant customers are too demanding. However, note that Combine Will still has unused IPO proceeds and potential new IPO proceeds from its proposed Korea dual listing.

**Net gearing remains healthy.** Net gearing has increased from 0.3x at end FY09 to 0.4x at end 1H10. However, with the significant increase in profitability, we expect cashflow to improve and reduce net gearing from 0.4x in FY11 to 0.1x by FY12. If the Korea listing goes ahead, there will be additional cash inflow which would reduce gearing.

Figure 11: Net gearing still manageable

Source: Company, CIMB Research

#### Valuation and recommendation

We believe Combine Will is set for double digit earnings growth over the next 2 years. As such, we have valued it on CY12 P/E of 7.0x, a 10% discount to our regional tech sector CY12 average P/E of 7.8x. There is no reason not to pencil in a discount given the more established track record of the companies in our tech sector coverage. Target price **\$\$0.50**, initiate with **BUY**.

As a matter of interest, one can also look at its closest listed competitor on SGX, Wah Shing International Holdings which was taken over by South China (China) Limited (413 HK). The deal was announced on 16th November 2005 and was completed on 5th May 2006 (source: Bloomberg). Based on details available from Bloomberg, the deal then valued Wah Shing at a historical CY04P/E of 6.0x.

#### Management

Figure 13: Board of Directors

Mr Tam Jo Tak

Executive Chairman & CEO

Mr Tam was appointed to the board on 27 December 2007. He is responsible for business and management activities of the company. Mr Tam has over 25 years of experience in toys product development and the manufacturing industry. Before founding Combine Will, he was product development director at Zindar Industrial Co. From 1982 to 1988, Mr Tam held senior positions with many US companies based in Hong Kong. He graduated from Loughborough University, UK in 1980 with a Bachelor of Science Honours degree in production engineering and management.

Mr Yau Hing Wah, John Executive Director

Mr Yau is the co-founder and Executive Director of the group with responsibility for ODM/ OEM business segment. He was appointed to the board on 27 December 2007. Mr Yau has over 20 years of experience in toy industry. Before founding Combine Will, he was a director at Wah Sing Toys Co Ltd with responsibility for production and operations of the company. Mr Yau obtained a Higher certificate in production and industrial engineering from the Hong Kong Polytechnic, majoring in Production Engineering, in 1981.

Mr Zheng Naiqiao, Koulman Executive Director

Mr Zheng is an Executive Director of Combine Will and is responsible for market and technological development, operations and quality control for Moulds and Tooling Business segment. He was appointed to the board in 27 December 2007. Prior to joining Combine Will in 200, he was manager of production and operations at Dyna Mechtronics Inc. Mr Zheng graduated with a Master of Science in Mechanical Engineering from the Northeastern University in Boston Massachusetts, USA.

Mr Chiu Hau Shun, Simon Executive Director

Mr Chiu is an Executive Director Combine Will. He was appointed to the board on 8 October 2007. In his previous appointment in the group, he was responsible for the company's finance and accounts. Presently, he is principally engaged in Human resources, Administration and Corporate Affairs. He is also a director in Simon Chiu and Associates Limited, a PRC consultancy business he founded in 1997. Prior to founding his own company, he was the CFO of various companies. Mr Chiu started his career as an accountant at Arthur Andersen. He received his education from Indiana University School of Business, USA.

#### **DISCLAIMER**

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation.

By accepting this report, the recipient hereof represents and warrants that he is entitled to receive such report in accordance with the restrictions set forth below and agrees to be bound by the limitations contained herein (including the "Restrictions on Distributions" set out below). Any failure to comply with these limitations may constitute a violation of law. This publication is being supplied to you strictly on the basis that it will remain confidential. No part of this report may be (i) copied, photocopied, duplicated, stored or reproduced in any form by any means or (ii) redistributed or passed on, directly or indirectly, to any other person in whole or in part, for any purpose without the prior written consent of CIMB.

CIMB, its affiliates and related companies, their directors, associates, connected parties and/or employees may own or have positions in securities of the company(ies) covered in this research report or any securities related thereto and may from time to time add to or dispose of, or may be materially interested in, any such securities. Further, CIMB, its affiliates and its related companies do and seek to do business with the company(ies) covered in this research report and may from time to time act as market maker or have assumed an underwriting commitment in securities of such company(ies), may sell them to or buy them from customers on a principal basis and may also perform or seek to perform significant investment banking, advisory or underwriting services for or relating to such company(ies) as well as solicit such investment, advisory or other services from any entity mentioned in this report. The views expressed in this report accurately reflect the personal views of the analyst(s) about the subject securities or issuers and no part of the compensation of the analyst(s) was, is, or will be directly or indirectly related to the inclusion of specific recommendations(s) or view(s) in this report. CIMB prohibits the analyst(s) who prepared this research report from receiving any compensation, incentive or bonus based on specific investment banking transactions or for providing a specific recommendation for, or view of, a particular company. However, the analyst(s) may receive compensation that is based on his/their coverage of company(ies) in the performance of his/their duties or the performance of his/their recommendations and the research personnel involved in the preparation of this report may also participate in the solicitation of the businesses as described above. In reviewing this research report, an investor should be aware that any or all of the foregoing, among other things, may give rise to real or potential conflicts of interest. Additional information is, subject to the duties of confidentiali

The term "CIMB" shall denote where applicable the relevant entity distributing the report in that particular jurisdiction where mentioned specifically below shall be a CIMB Group Sdn Bhd's affiliates, subsidiaries and related companies.

  - (a)

The information contained in this research report is prepared from data believed to be correct and reliable at the time of issue of this report. This report does not purport to contain all the information that a prospective investor may require. CIMB or any of its affiliates does not make any guarantee, representation or warranty, express or implied, as to the adequacy, accuracy, completeness, reliability or fairness of any such information and opinion contained in this report and accordingly, neither CIMB nor any of its affiliates nor its related persons shall be liable in any manner whatsoever for any consequences (including but not limited to any direct, indirect or consequential losses, loss of profits and damages) of any reliance thereon or usage thereof.

This report is general in nature and has been prepared for information purposes only. It is intended for circulation amongst CIMB and its affiliates' clients generally and does not have regard to the specific investment objectives, financial situation and the particular needs of any specific person who may receive this report. The information and opinions in this report are not and should not be construed or considered as an offer, recommendation or solicitation to buy or sell the subject securities, related investments or other financial instruments thereof.

Investors are advised to make their own independent evaluation of the information contained in this research report, consider their own individual investment objectives, financial situation and particular needs and consult their own professional and financial advisers as to the legal, business, financial, tax and other aspects before participating in any transaction in respect of the securities of company(ies) covered in this research report. The securities of such company(ies) may not be eligible for sale in all jurisdictions or to all categories of investors.

Australia: Despite anything in this report to the contrary, this research is provided in Australia by CIMB Research Pte. Ltd. ("CIMB") and CIMB notifies each recipient and each recipient acknowledges that CIMB is exempt from the requirement to hold an Australian financial services licence under the Corporations Act 2001 (Cwlth) in respect of financial services provided to the recipient. CIMB is regulated by the Monetary Authority of Singapore under the laws of Singapore, which differ from Australian laws. This research is only available in Australia to persons who are "wholesale clients" (within the meaning of the Corporations Act 2001 (Cwlth)) and is supplied solely for the use of such wholesale clients and shall not be distributed or passed on to any other person. This research has been prepared without taking into account the objectives, financial situation or needs of the individual recipient.

France: Only qualified investors within the meaning of French law shall have access to this report. This report shall not be considered as an offer to subscribe to, or used in connection with, any offer for subscription or sale or marketing or direct or indirect distribution of financial instruments and it is not intended as a solicitation for the purchase of any financial instrument.

Hong Kong: This report is issued and distributed in Hong Kong by CIMB Securities (HK) Limited ("CHK") which is licensed in Hong Kong by the Securities and Futures Commission for Type 1 (dealing in securities), Type 4 (advising on securities) and Type 6 (advising on corporate finance) activities. Any investors wishing to purchase or otherwise deal in the securities covered in this report should contact the Head of Sales at CIMB Securities (HK) Limited. The views and opinions in this research report are our own as of the date hereof and are subject to change. If the Financial Services and Markets Act of the United Kingdom or the rules of the Financial Services Authority apply to a recipient, our obligations owed to such recipient therein are unaffected. CHK has no obligation to update its opinion or the information in this research report.

This publication is strictly confidential and is for private circulation only to clients of CHK. This publication is being supplied to you strictly on the basis that it will remain confidential. No part of this material may be (i) copied, photocopied, duplicated, stored or reproduced in any form by any means or (ii) redistributed or passed on, directly or indirectly, to any other person in whole or in part, for any purpose without the prior written consent of CHK. Unless permitted to do so by the securities laws of Hong Kong, no person may issue or have in its possession for the purposes of issue, whether in Hong Kong or elsewhere, any advertisement, invitation or document relating to the securities covered in this report, which is directed at, or the contents of which are likely to be accessed or read by, the public in Hong Kong (except if permitted to do so under the securities laws of Hong Kong).

Indonesia: This report is issued and distributed by PT CIMB Securities Indonesia ("CIMBI"). The views and opinions in this research report are our own as of the date hereof and are subject to change. If the Financial Services and Markets Act of the United Kingdom or the rules of the Financial Services Authority apply to a recipient, our obligations owed to such recipient therein are unaffected. CIMBI has no obligation to update its opinion or the information in this research report.

This publication is strictly confidential and is for private circulation only to clients of CIMBI. This publication is being supplied to you strictly on the basis that it will remain confidential. This publication is strictly confidential and is for private circulation only to clients of CIMBS. This publication is being supplied to you strictly on the basis that it will remain confidential. No part of this material may be (i) copied, photocopied, duplicated, stored or reproduced in any form by any means or (ii) redistributed or passed on, directly or indirectly, to any other person in whole or in part, for any purpose without the prior written consent of CIMBS.

United Arab Emirates: The distributor of this report has not been approved or licensed by the UAE Central Bank or any other relevant licensing authorities or governmental agencies in the United Arab Emirates. This report is strictly private and confidential and has not been reviewed by, deposited or registered with UAE Central Bank or any other licensing authority or governmental agencies in the United Arab Emirates. This report is being issued outside the United Arab Emirates to a limited number of institutional investors and must not be provided to any person other than the original recipient and may not be reproduced or used for any other purpose. Further, the information contained in this report is not intended to lead to the sale of investments under any subscription agreement or the conclusion of any other contract of whatsoever nature within the territory of the United Arab Emirates.

United Kingdom: This report is being distributed by CIMB Securities (UK) Limited only to, and is directed at selected persons on the basis that those persons are (a) persons falling within Article 19 of the Financial Services and Markets Act 2000 (Financial Promotions) Order 2005 (the "Order") who have professional experience in investments of this type or (b) high net worth entities, and other persons to whom it may otherwise lawfully be communicated, falling within Article 49(1) of the Order, (all such persons together being referred to as "relevant persons"). A high net worth entity includes a body corporate which has (or is a member of a group which has) a called-up share capital or net assets of not less than (a) if it has (or is a subsidiary of an undertaking which has) more than 20 members, £500,000, (b) otherwise, £5 million, the trustee of a high value trust or an unincorporated association or partnership with assets of no less than £5 million. Directors, officers and employees of such entities are also included provided their responsibilities regarding those entities involve engaging in investment activity. Persons who do not have professional experience relating to investments should not rely on this document.

United States: This research report is distributed in the United States of America by CIMB Securities (USA) Inc, a U.S. registered broker-dealer and a related company of CIMB Research Pte Ltd solely to persons who qualify as "Major U.S. Institutional Investors" as defined in Rule 15a-6 under the Securities and Exchange Act of 1934. This communication is only for Institutional Investors and investment professionals whose ordinary business activities involve investing in shares, bonds and associated securities and/or derivative securities and who have professional experience in such investments. Any person who is not an Institutional Investor must not rely on this communication. However, the delivery of this research report to any person in the United States of America shall not be deemed a recommendation to effect any transactions in the securities discussed herein or an endorsement of any opinion expressed herein. For further information or to place an order in any of the above-mentioned securities please contact a registered representative of CIMB Securities (USA) Inc.

Other jurisdictions: In any other jurisdictions, except if otherwise restricted by laws or regulations, this report is only for distribution to professional, institutional or sophisticated investors as defined in the laws and regulations of such jurisdictions.
